

Gabriel Bendix

Education

The Herbert Wertheim College of Engineering, University of Florida	Gainesville, Florida
Bachelor of Science in Computer Engineering	May 2027
Relevant Coursework: Microprocessors Applications, Operating Systems, Digital Logic and Design, Circuits	

Relevant Experience

The Lens Link	Gainesville, Florida
<i>Software Development Team Lead</i>	September 2025 – Present

- Leading React Native mobile app MVP development with camera recognition and on-device eyewear try-on.
- Architecting The Lens Link e-commerce platform using Next.js APIs, CI/CD, analytics, and adaptive marketing.

University of Florida Computer Engineering Department	Gainesville, Florida
<i>FPGA Hardware Pipeline Research Co-Author</i>	January 2025 – Present

- Co-authored a submission proposing an edge native pixel to analysis pipeline for UAV swarms: an FPGA front end does multi object tracking, emitting a per object state that a quantized-on device LLM ingests to infer intent.
- Developed a pipeline that eliminates cloud dependence, slash uplink needs and keep latency deterministic.
- Achieved 66.7 ms latency (~15 FPS, 320×240), 6-10 W power, near-zero uplink, using under 2% FPGA logic.

CANAC Data Processing	São Paulo, Brazil
<i>Software Development Intern</i>	May 2025 – July 2025

- Utilized the production data from Brazilian cane mills to develop online panels, providing harvesters with real time analytics and alerts when making logistical decisions, increasing total cane production and data accuracy by 20%.
- Leveraged SQL with Google BigQuery to analyze 500,000 data points in a web-based climate visualization panel.
- Built interactive React dashboards rendering filterable climate heatmaps, vector tile layers for plots, and station pins.

FEI University Robotics	São Bernardo, Brazil
<i>Electrical Team Member</i>	May 2025 – July 2025

- Deployed a GPU accelerated computer vision pipeline with ZED 2i depth sensing camera for autonomous robots.
- Used CUDA and ROS on Ubuntu Linux to run autonomous navigation algorithms for a robotics competition.

Leadership Development

UF Engineering Innovation Institute	Gainesville, Florida
<i>Program Leader</i>	May 2024 – October 2024

- Led IGNITE, the only EII backed program promoting entrepreneurship at UF with panels, VCs, and workshops.
- Executed a campus outreach overhaul that increased awareness by 80%, building cross organization partnerships (e.g. SHPE, UF Blackstone Launchpad), establishing flagship events, and launching targeted media campaigns.

Medi Connect Digital	Berlin, Germany
<i>Team CEO</i>	July 2024 – August 2024

- Elected to lead Medi Connect Digital, a venture built to help tourists navigate foreign healthcare systems.
- Awarded first place out of six teams based on projected market cap, by a panel of two Berlin incubator leaders.
- Built a web prototype integrating a ChatGPT wrapper with a Maps API for medication guidance and navigation.

NASA Technology Transfer Program	Gainesville, Florida
<i>Fire Archy Team Leader</i>	November 2024

- Conceived and prototyped a three-pronged wildfire awareness system to safeguard 3.3M Americans annually.
- Lead the team awarded 1st place and \$6,000 in prizes by NASA/UF judges for real world applicability and breadth.

Skills & Interests

Proficient Languages: Portuguese, English, Spanish, Assembly, VHDL, Verilog, Python, C++, JavaScript, CSS

Programs: Miami Youth Symphony (Violinist), UF Blackstone Launchpad (Comp. Winner), MLP (Latinx leadership)
