

Gabriel Bendix

Education

The Herbert Wertheim College of Engineering, University of Florida

Gainesville, Florida

Bachelor of Science in Computer Engineering

May 2027

Relevant Coursework: Microprocessors Applications, Operating Systems, Digital Design, Reconfigurable Circuits

Relevant Experience

The Lens Link

Gainesville, Florida

Software Development Team Lead

September 2025 – Present

- Leading React Native mobile app MVP development with camera recognition and on-device eyewear try-on.
- Architecting The Lens Link e-commerce platform using Next.js APIs, CI/CD, analytics, and adaptive marketing.

University of Florida Computer Engineering Department

Gainesville, Florida

FPGA Hardware Pipeline Published Research Co-Author

January 2025 – Present

- Co-authored published ISQED 2026 research on an edge-native UAV swarm perception pipeline using an FPGA front end for multi-object tracking and an on-device quantized LLM for semantic reasoning.
- Built a pixels-to-semantics pipeline eliminating cloud dependence and near-zeroing uplink needs.
- Demonstrated 66.7 ms visual latency at 320×240, ~15 FPS, near-zero uplink, and under 2% FPGA LUT utilization.

CANAC Data Processing

São Paulo, Brazil

Software Development Intern

May 2025 – July 2025

- Utilized the production data from Brazilian cane mills to develop online panels, providing harvesters with real time analytics and alerts when making logistical decisions, increasing total cane production and data accuracy by 20%.
- Leveraged SQL with Google BigQuery to analyze 500,000 data points in a web-based climate visualization panel.
- Built interactive React dashboards rendering filterable climate heatmaps, vector tile layers for plots, and station pins.

FEI University Robotics

São Bernardo, Brazil

Electrical Team Member

May 2025 – July 2025

- Deployed a GPU accelerated computer vision pipeline with ZED 2i depth sensing camera for autonomous robots.
- Used CUDA and ROS on Ubuntu Linux to run autonomous navigation algorithms for a robotics competition.

Leadership Development

UF Engineering Innovation Institute

Gainesville, Florida

Program Leader

May 2024 – October 2024

- Led IGNITE, the only EII backed program promoting entrepreneurship at UF with panels, VCs, and workshops.
- Executed a campus outreach overhaul that increased awareness by 80%, building cross organization partnerships (e.g. SHPE, UF Blackstone Launchpad), establishing flagship events, and launching targeted media campaigns.

Medi Connect Digital

Berlin, Germany

Team CEO

July 2024 – August 2024

- Elected to lead Medi Connect Digital, a venture built to help tourists navigate foreign healthcare systems.
- Awarded first place out of six teams based on projected market cap, by a panel of two Berlin incubator leaders.
- Built a web prototype integrating a ChatGPT wrapper with a Maps API for medication guidance and navigation.

NASA Technology Transfer Program

Gainesville, Florida

Fire Archy Team Leader

November 2024

- Conceived and prototyped a three-pronged wildfire awareness system to safeguard 3.3M Americans annually.
- Lead the team awarded 1st place and \$6,000 in prizes by NASA/UF judges for real world applicability and breadth.

Skills & Interests

Proficient Languages: Portuguese, English, Spanish, Assembly, VHDL, Verilog, Python, C++, JavaScript, CSS

Programs: Miami Youth Symphony (Violinist), UF Blackstone Launchpad (Comp. Winner), MLP (Latinx leadership)
